Stuller.com

When Stuller was founded in 1970, Matt Stuller set out to satisfy the customer. Today, 46 years later, that same vision holds true.

Stuller has been beside you over the years, growing product lines tailored to your needs and creating more ways to help you succeed. We have an extensive inventory that includes fashion jewelry, bridal jewelry, diamonds, gemstones, mountings, findings, tools, metals, packaging and displays. You are sure to find everything you need, every time.

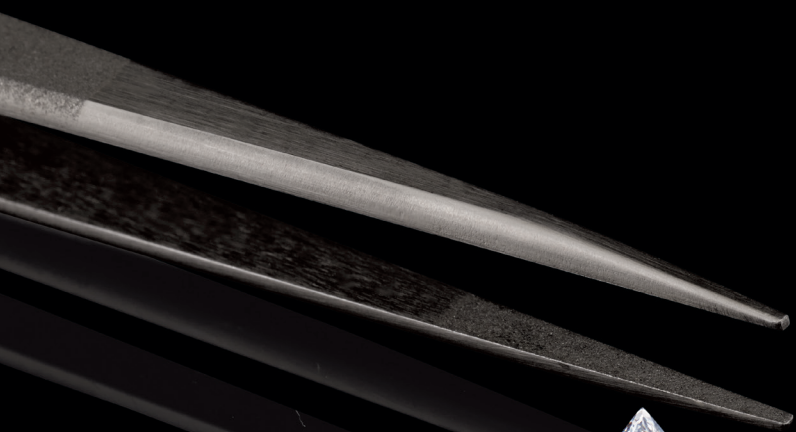

Often, you need more than stylish products. So, we design sales aids for just this purpose. Use Stuller.com to get real-time product information available 24/7. Enhancing your tried and true selling techniques with digital solutions is the new world of doing business.

Your success is our ultimate goal.

The Four Cs of Diamonds

Fine diamonds are among the most coveted gems. To determine a diamond's value, experts use the *Four Cs* — *Cut, Color, Clarity, and Carat Weight*.

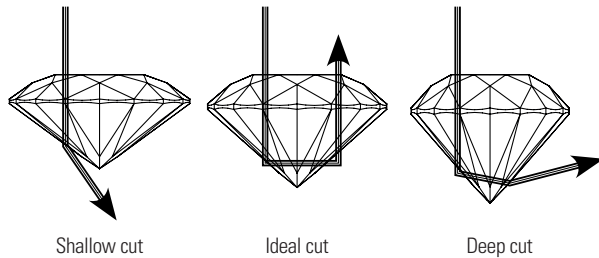

To a great extent, cut, color and clarity depend on the quality of the rough diamond.

CUT

While cut does describe shape, when discussing the four Cs it refers to the overall proportions and finish of the diamond.

A diamond's overall proportions, as well as the size and position of its facets, make up the cut. The consistency and balance of these can greatly affect how the stone captures light and reflects it back to the eye. When a diamond is cut with the proper proportions, light enters the diamond and is returned through the top of the diamond. If a diamond is too shallow, light will escape from the bottom of the stone. If it is cut too deep, light will escape from the pavilion.

Studies have been conducted to find the optimum proportions of a diamond's cut so that it has the greatest amount of sparkle. If its cut falls within these parameters, it is considered an ideal cut. Diamonds with fine proportions, symmetry, and polish optimize their interaction with light and have increased brilliance, dispersion, and scintillation.

COLOR

One factor that determines the value of a diamond is its color. With the exception of fancy-colored diamonds, the most valuable diamonds are those with the least color. Although many people think of gem quality diamonds as colorless, completely colorless diamonds are very rare. The diamond color scale ranges from D (colorless) to Z (light yellow or brown). A diamond's color is determined by a manual process of comparing the diamond to a master set. Each letter grade represents a range of color and is a measurement of how noticeable a color is.

When diamonds are formed with traces of other minerals, rare and beautiful colors can result. These "fancy" colors range from blue and brilliant yellow to red, brown, pale green, pink, and violet. Because of their rarity, colored diamonds are highly desirable and typically more valuable.

DEF	GHIJ	KLM	NOPQR	STUVWXY	Z+
Colorless	Near Colorless	Faint Yellow	Very Light Yellow	Light Yellow	Fancy

CLARITY

A diamond's clarity is measured by the existence or absence of visible flaws. Tiny surface blemishes or internal inclusions, even those seen only under magnification, can alter the brilliance of the diamond and thus affect its value. Clarity levels begin with flawless (FL, IF), followed by very, very slight (VVS1, VVS2), very slight (VS1, VS2), slightly included (SI1, SI2), and included (I1, I2, and I3).

FL, IF Diamonds	Flawless: No internal or external flaws Internally Flawless: No internal flaws
VVS1, VVS2 Diamonds	Very, very slightly included: Very difficult to see inclusions under 10X magnification
VS1, VS2 Diamonds	Very slightly included: Inclusions are not typically visible to the unaided eye
SI1, SI2 Diamonds	Slightly included: Inclusions are visible under 10X magnification and may be visible with the unaided eye
I1, I2, I3 Diamonds	Included: Inclusions are visible with the unaided eye

CARAT

Carat refers to a diamond's weight. One carat, the traditional unit of measurement for diamonds, is approximately 0.2 grams. You may also hear the weight of a diamond referred to in points. One carat is equivalent to 100 points, so a 75-point diamond is equal to 0.75 carats. Because they are rarer, larger diamonds have greater value per carat, so the price of a diamond rises exponentially to its size.

RARITY AND BEAUTY

All gem-quality diamonds are rare, taking billions of years for nature to form them. The journey from the mine to you is long and arduous. While the four Cs information helps you to identify the quality of the diamond you are purchasing, it is the combination of these four characteristics which determine a diamond's rarity and therefore its value.

Gem Species: Diamond

Hardness: 10

Enhancement Code: Natural, unless otherwise indicated

ROUND OR SQUARE DIAMONDS

VS; F+; Round diamonds: (Very slightly included) – The diamond may contain very minor inclusions, these inclusions are not typically visible when viewed under 10X magnification and are not visible to the unaided eye; colorless; very good make

VS; G-H; Round or square diamonds: (Very slightly included) – The diamond may contain very minor inclusions, these inclusions are not typically visible when viewed under 10X magnification and are not visible to the unaided eye; near colorless; very good make

S11; G-H; Round or square diamonds: (Slightly included) Small inclusions may be visible when viewing the diamond under 10X magnification; near colorless; very good make

S12-S13; G-H; Round or square diamonds: Slight inclusions are very easily seen when the diamond is viewed under 10X magnification; near colorless; good to very good make

I1; G-H; Round or square diamonds: When viewing the diamond with the table facing up, one may see inclusions with the unaided eye; near colorless; good to very good make

I2; G-H; Round diamonds: When viewing the diamond with the table facing up, one can easily see inclusions with the unaided eye; near colorless; good make

I3; G-H; Round diamonds: When viewing the diamond with the table facing up, inclusions are obvious to the unaided eye; near colorless; good make

S11; I-J; Round or square diamonds: (Slightly included) Small inclusions may be visible when viewing the diamond under 10X magnification; near colorless; very good make

S12-S13; I-J; Round or square diamonds: Slight inclusions are very easily seen when the diamond is viewed under 10X magnification; near colorless; good to very good make

I1; I-J; Round or square diamonds: When viewing the diamond with the table facing up, one may see inclusions with the unaided eye; near colorless; good to very good make

FANCY SHAPED DIAMONDS

VS; G-I; Fancy shapes, excluding *square: (Very slightly included) – The diamond may contain very minor inclusions, these inclusions are not typically visible when viewed under 10X magnification and are not visible to the unaided eye; near colorless; very good make

S11; G-I; Fancy shapes, excluding *square: (Slightly included) Small inclusions may be visible when viewing the diamond under 10X magnification; near colorless; very good make

S12-S13; G-I; Fancy shapes, excluding *square: Slight inclusions are very easy to see when viewing the diamond under 10X magnification; near colorless; good to very good make

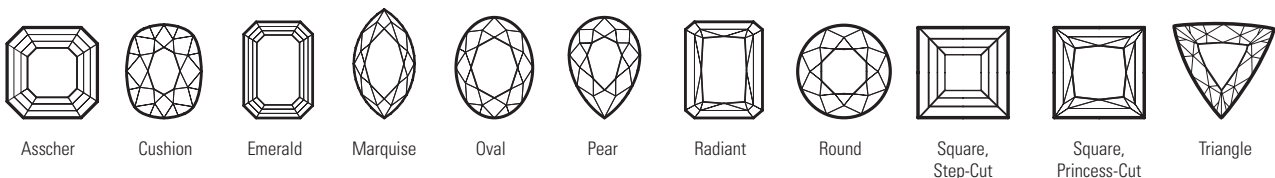

I1; G-I; Fancy shapes, excluding square: When viewing the diamond with the table facing up, one may see inclusions with the unaided eye; near colorless; good to very good make

DIAMOND CARE

Diamond is rated “excellent” for everyday wear. Avoid placing your diamond jewelry where it might scratch another gem or get scratched by another diamond. Although a diamond is the hardest material known to humankind, it is not the toughest, diamonds can chip or break if worn while doing heavy work or receiving a sharp blow. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit.

A Brilliant Choice

Stuller precision melee™ round diamonds give you greater brilliance with approximately 8% less weight. They're cut better, look better, and don't necessarily cost more.

They are sold in precise increments of .05mm (with a range of .10mm within each size for the flexibility required in your most intricate jobs).

Available in VS, G+ or S11, G+ assortments.

For more information, visit
Stuller.com/Precision-Melee.

Bourbon on Ice®

This ring, trademarked as Bourbon On Ice®, was created by one of our customers, Clark Jewelers in Elizabethtown, KY, using Stuller cognac diamond and our intuitive CounterSketch® jewelry design software.

Stuller's Diamonds and Gemstones selection and our CounterSketch® software offer a potent combination for innovative custom creations.

For more information, visit Stuller.com/CounterSketch.

Diamonds of Canadian Origin

Our Red Box Diamond selection includes diamonds of Canadian origin.

All Canadian diamonds come with both a GIA® diamond grading report and a CanadaMark® card verifying the stones origin, and allowing for transparent tracking from mine to market.

Stuller is a proud signatory of the Canadian Diamond Code of Conduct (CDCC), essential to selling and authenticating Canadian diamonds.

Red Box Diamonds®

Red Box Diamonds exist to put your mind — and your customer's — at rest.

Whenever you buy a Red Box Diamond, you know you will receive
a compelling combination of beauty and security.

Red Box Diamonds are beautiful. We ensure that by
selecting them all by hand. Each diamond is also individually graded.

We further enhance your stone's individuality by laser inscribing a unique numeric identifier.

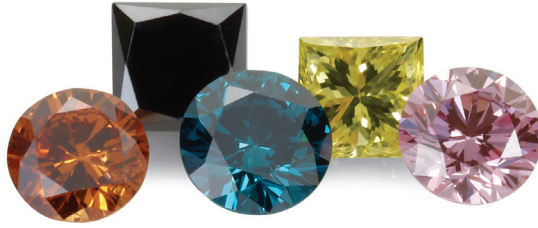

This number corresponds to its grading report, which you receive with your purchase.

Your customer, in turn, receives added measures of security. Should they ever wish
to trade up for a more valuable diamond in our active inventory, we guarantee
a credit equal to the original purchase price of their Red Box Diamond.

Each Red Box Diamond also comes with one year of complimentary loss protection,
a helpful selling point for customers daunted at the prospect of a major purchase.

*For more on the benefits of selecting a
Red Box Diamond, visit Stuller.com/RedBox.*

Color-Enhanced Diamonds

When a white diamond just won't do, color-enhanced diamonds may hold the key to satisfying your customer. Combine the variety of possible hues with the brilliance and durability of a diamond for a match your customer will love.

These fashionable stone colors are available —

Apple Green • Purple • Burnt Orange • Dark Green
Pink • Garnet Red • Aqua Blue • Teal Blue • Yellow

See these handy tips on caring for color-enhanced diamonds

Irradiated color diamonds, like all diamonds, are legendary for their hardness and durability. They require no special attention in daily use, and are unlikely to change unless they are subjected to temperatures of over 450° C (850° F).

When it comes time to offer advice on how your jeweler or customer should care for irradiated diamonds, here are some important points to cover —

- Settings – Irradiated colored diamonds can be channel-set, prong-set, invisible-set, bezel-set, flush-set, or used in pave, but they cannot be wax-set because that process involves high temperatures.
- Cleaning – Irradiated colored diamonds can be cleaned just like regular white diamonds using steam, ultrasonic, acid, or any jewelry cleaner. To clean a colored diamond at home, use a soft toothbrush and soapy water.

Black Box Gemstones®

Hand selected for beauty and rarity... just for you.

Stuller's Black Box Gemstones offer a mixture of incredible stone quality and unrivalled purchasing perks. Picked for their loveliness and uniqueness, Black Box Gemstones are also documented and protected through several means. Each stone comes with a grading report completed by either a GIA®-trained Stuller expert or an independent lab. This report corresponds to a unique number, which is laser-inscribed onto each stone, offering proof positive identification. And each Black Box purchase comes with one year of free loss protection, which protects your customer from theft, damage, and loss.

For a stunning center gem that represents the best our vault has to offer, look no further than Black Box Gemstones.

To learn more, visit Stuller.com/BlackBox.

Gem Species: Chrysoberyl

Hardness: 8.5

Enhancement Code: N

Quality Information:

AB: Fractures break the surface; varies in color and clarity

A: Light green to greenish blue, weak to low color change; included

AA: Green to greenish blue, moderate to medium color change; slightly included

Care: Rated "excellent" for everyday wear. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Major Sources: Brazil, Madagascar, Sri Lanka

Flickering between a noble green and a deep red depending on the light, the finest specimens of Alexandrite are among the world's most rare and coveted gems. Alexandrite was discovered in the Ural Mountains of Russian in 1830, supposedly on the birthday of its namesake, the eventual Czar, Alexander II. The conventional stone for the 45th wedding anniversary, Alexandrite has an impressive reputation despite being relatively new on the scene. To this day, many Russians believe that Alexandrite imparts good luck to the wearer.

The most coveted quartz, amethyst is celebrated for its calming, deep violet hue. From a Greek word meaning “not drunk,” amethyst was also the name of legendary maiden transformed into a purple stone by Bacchus, the god of wine.

Stuller.com/Amethyst

Gem Species: Quartz

Hardness: 7

Enhancement Code: H

Quality Information:

B: Light purple, little or no color zoning; eye clean to slight imperfections

A: Light to medium purple, little or no color zoning; eye clean to slight imperfections; good cut

AA: Medium to medium dark purple, little or no color zoning; eye clean to slight imperfections; good cut

AAA: Deep purple, little or no color zoning; eye clean to slight imperfections; good cut

Swarovski Gemstones™ Lilac Fine: Light to medium color; minimal eye visible inclusions

Swarovski Gemstones™ Violet Fine: Medium to dark color; minimal eye visible inclusions

Care: Rated “good” for everyday wear. Avoid direct sunlight and exposure to heat which may cause color to fade. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Special Ordering Diamonds And Gemstones

At Stuller, we know that your diamond and gemstone needs sometime call for added attention to detail. And we are happy to assist you with any inquiry you might have, no matter how detailed. If you are looking for a stone we normally don't offer, don't be discouraged. We can help.

Because of our vast network of established sources, we can search and find just about any stone you desire. Our special order team is well versed in listening to your needs and tracking down the stone you're looking for. We can have a quote ready for you within 24-48 hours for gemstones and five days for diamonds. Once we have your approval on price and delivery date, we'll order, match, and deliver exactly what you need.

Graduation rings are one great example of how our special order team can help. Increasingly, graduates (and the people who buy their rings) are looking for more unique, personalized options that go beyond the traditional offerings.

To find that special stone you need, and to take advantage of this convenient, complimentary service, call 1-800-877-7777, and dial extension 540 for diamonds or extension 546 for gemstones.

"My daughter is a junior in high school and was ready to shop for a class ring. She didn't want a traditional class ring, so I checked into Stuller's selection. Everyone was very helpful, telling me how to go about picking the right style, the right design, and the right stones. I was very impressed with all that can be done. Thanks to Stuller, she will get the unique class ring she wants."

- Ursula Thompson

Gem Species: Quartz**Hardness:** 7**Enhancement Code:** N**Quality Information:****AA:** Light to medium purple and light to medium golden yellow; eye clean; good cut and polish**Care:** Rated "good" for everyday wear. Avoid direct sunlight and exposure to heat which may cause color to fade. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.**Major Sources:** Bolivia

A blend of amethyst and citrine resulting from varying temperatures across one stone, ametrine derives almost exclusively from one mine deep in the lowlands of Bolivia. A popular legend links ametrine to a certain Princess Anahi of the Bolivian Ayoreo tribe. Engaged in a forbidden love affair with a conquistador (as the story goes), her tribesmen kill her, but not before she gives her lover a gift — a glowing crystal of ametrine.

Trained Pros With Direct Stone Access

For expert, individualized attention regarding specific stones in our inventory, you can always count on our diamonds and gemstones sales specialists. Located in the same room as the stones, they have quick access to the item you are interested in. When you call with specific inquiries, they can simply walk across the room to the vault to inspect the piece directly and answer any questions you might have.

Every one of our specialists knows the inventory inside and out, and all are GIA®-trained.

To contact a Specialist, dial 800-877-7777.

Choose Option 5 (for Diamonds) or Option 6 (for Gemstones).

Aquamarine is the essential light blue gem. Meaning “ocean water,” aquamarine is a close — though less rare — cousin to other beryls like emerald and morganite. A chosen amulet of sailors in antiquity, aquamarine was believed to promote youthful vitality, health, and mental clarity.

Stuller.com/Aquamarine

Gem Species: Beryl

Hardness: 7.5-8

Enhancement Code: H

Quality Information:

B: Light color; included; good cut

A: Medium to light color; slightly included; good cut

AA: Medium color; eye clean; good cut

AAA: Medium to dark color; eye clean; good cut

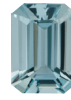

Care: Rated “good” for everyday wear. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Gem Species: Chalcedony

Hardness: 6.5-7

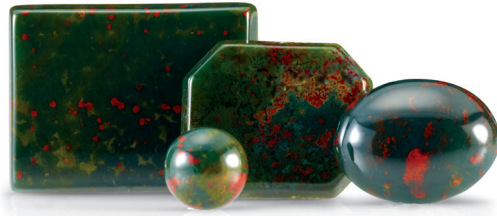

Enhancement Code: N

Quality Information:

Standard: Dark green with red to brownish spots

Care: Rated “fair” for everyday wear. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Australia, Brazil, China, India, United States

Not surprisingly, bloodstone — also known as heliotrope — has attracted a fair deal of superstition and legend over the years. Popular particularly in men’s signet rings going back to ancient Rome, bloodstone was believed to earn the wearer consideration and respect, and to impart health and protection from deception in business dealings.

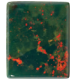

Stuller.com/Bloodstone

DID YOU KNOW?

In October 2002, Tanzanite was added as an additional birthstone for December to the official birthstone list by the AGTA.

Prized by the Romans and revived in the Renaissance and again in the Victorian era, cameos offer an affordable choice for customers whose tastes run toward the vintage or aristocratic. Made from various materials featuring different colored layers, such as cowry shells or agate, a cameo emerges when one layer is chipped away and engraved, leaving a second layer as the background.

Stuller.com/Cameo

Gem Species Shell: Calcareous
Gem Species Agate: Chalcedony

Shell Hardness: 3.5-4
Agate Hardness: 3.5-4

Shell Enhancement Code: N
Agate Enhancement Code: D

Quality Information:

Shell Carving: White face on orange to brown back ground; facing left or right

Agate Carving: White face on black agate background; facing left or right

Care: Cameos are quite fragile; not for everyday wear. Care should be taken when wearing. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, wipe gently with a moist cloth. For gem properties and reactions, see pages 176-177.

Shell Major Sources: Tropic and sub-tropic zones

Gem Species: Chalcedony

Hardness: 6.5-7

Enhancement Code: D, H

Quality Information:

Standard: Orangey red to brownish orange; medium dome

Care: Rated “fair” for everyday wear. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Brazil, India, Uruguay

Thought to promote bravery, improve public speaking, and protect the wearer from envy, this smooth red stone was prized across the ancient world. Popular as intaglios in men’s signet rings, partially because waxes did not stick to it, carnelians were also prized in ancient Egypt, where they show up as amulets and funeral scarabs.

Care: Rated “fair” for everyday wear. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Africa

Chalcedony is the family name for cryptocrystalline quartz — quartz whose crystals are too small to be seen by the naked eye. In the jewelry world, chalcedony usually refers more specifically to blue, light gray, and white stones, with a range of blue stones being the most popular.

Chrysoprase

The most sought-after member of the chalcedony family, chrysoprase takes its name from a Greek word meaning “gold-green.” Colored by small quantities of nickel, fine chrysoprase can resemble fine jade, and its beauty and affordability have made it a popular choice for the decoration of many fine interior spaces, such as the Wenceslaus Chapel in Prague and the Sans Souci Castle in Potsdam.

Stuller.com/Chrysoprase

Citrine, which takes its name from the French word “citron,” or lemon, is a golden yellow quartz tinted by traces of iron. Extremely rare in nature, most citrine is created by heating amethyst. Like golden topaz, for which it was often confused in the past, citrine’s autumnal colors make it a fitting November birthstone.

A brooding, reddish-brown citrine, Madeira citrine takes its name from the dark sherry wine of the Madeira Islands.

Stuller.com/Madeira-Citrine

Gem Species: Quartz

Hardness: 7

Enhancement Code: H

Quality Information:

Madeira: Medium to dark brownish orange; eye clean

Care: Rated "good" for everyday wear. Avoid direct sunlight and exposure to heat which may cause color to fade. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Gem Species: Calcareous

Hardness: 3.5-4

Enhancement Code: N

Quality Information:

Standard Pink: Light to medium salmon; good polish; good shape (beads may display possible natural cracks and blemishes)

Standard Red: Medium to dark orangey red; good polish; good shape (beads may display possible natural cracks and blemishes)

Care: Coral is not for everyday wear, and one should take care when wearing. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, wipe gently with a moist cloth. For gem properties and reactions, see pages 176-177.

Major Sources: Australia, Ireland, Japan, Malaysia, Mediterranean Sea, Philippines, Taiwan

Like pearl, coral is one of the few famous organic gems. Made from the discarded shells of marine invertebrates, polished coral (also known as calcium carbonate) was treasured by sailors as a charm against rough seas. Ancient Romans and Persians used it to cure madness and impart wisdom, and, in India, it was ingested in powdered form as an aphrodisiac.

Ancient history records Emerald mines near the Red Sea called “Cleopatra’s Mines,” where the Pharaohs sent workers to gather gems between 3000 and 1500 B.C. History also speaks of the Maharajas of India, whose treasure vaults were filled with emeralds — often believed to bring luck and health. The green of emerald is representative of life and springtime.

Stuller.com/Emerald

Gem Species: Beryl

Hardness: 7.5-8

Enhancement Code: 0

Quality Information:

B: Light color; included (cloudy); good cut; good polish

A: Medium color; slightly included; good cut; good polish

AA: Medium dark to dark color; slightly included; high brilliance; good cut; good polish

Commercial: Commercial quality; variation in color; included

Care: Rated “fair to good” for everyday wear with care. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Black Box Gemstones® Emeralds And Rubies

The Black Box Gemstones promise lives up to the prestige of the two reigning colored gemstones: ruby and emerald. Hand selected for beauty and rarity, Black Box gemstones also have a unique numeric inscription. This identifier links it to a detailed grading report developed by either an independent lab or our team of GIA® and AGS®-trained specialists.

RUBIES

Often referred to as the “king of gems,” the ruby has inspired lust and reverence for centuries. Like all noble things, the ruby demands attention. Seemingly an incarnation of our most intense emotions — love, anger, passion, or fury — ruby has always been sought after by the powerful and had the power to create desire. For ancient writers, a ruby’s seductive glow seemed to be the result of an internal, inextinguishable flame.

EMERALDS

Believed to foster good fortune and to promote physical and mental well-being, emeralds represent the epitome of green gemstones and is thought to embody the purest and most vibrant colors of the natural world.

To learn more, visit Stuller.com/BlackBox.

January's birthstone, garnet is a beautiful, hardy, and abundant gem with a distinct and desirable color profile. Mozambique garnet, a fiery pyrope, offers the warm, wine-red color that garnets are best known for.

Gem Species: Pyrope

Hardness: 7-7.5

Enhancement Code: N

Quality Information:

AA: Medium to dark red to orange brown; eye clean; good cut

Care: Rated "good" for everyday wear. Avoid exposure to heat and sudden changes in temperature. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Africa

Rhodolite Garnet

In a lighter red hue, tinged by varying shades of purple and pink, rhodolite garnet takes its name from the vivid blooms of the mountain rhododendron, which grows in the Appalachian regions where the stone is mined. The words rhodolite and rhododendron both derive from a Greek word meaning, “rose”, or “rose-colored.”

Stuller.com/Rhodolite-Garnet

Gem Species: Rhodolite

Hardness: 7-7.5

Enhancement Code: N

Quality Information:

AA: Medium to dark raspberry to plum; eye clean; good cut

Swarovski Gemstones™ Pink Rose Fine: Light to medium color; minimal eye visible inclusions

Swarovski Gemstones™ Raspberry Fine: Medium to dark color; minimal eye visible inclusions

Care: Rated “good” for everyday wear. Avoid exposure to heat and sudden changes in temperature. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Spessartite Garnet

Sometimes called mandarin garnet in its yellow/orange variation, spessartite garnet, or spessartine, offers a stunning color complement to citrine or golden topaz. Taking its name from the Bavarian Spessart district, where it was first identified, spessartite, like other garnets, are believed by some to alleviate depression and blood-related sickness.

Stuller.com/Spessartite-Garnet

Gem Species: Spessartite

Hardness: 7-7.5

Enhancement Code: N

Quality Information:

AA: Medium yellowish orange; very slightly included; good cut

Care: Rated "good" for everyday wear. Avoid exposure to heat and sudden changes in temperature. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

DID YOU KNOW?

The largest faceted gemstone in the world is a record-holding topaz that was found in Brazil and weighs almost 37,000 carats.

Gem Species: Grossularite

Hardness: 7-7.5

Enhancement Code: N

Quality Information:

AA: Light to medium yellowish green; excellent color; eye clean; excellent polish

AAA: Medium to medium dark very slightly yellowish green; excellent color; eye clean; excellent polish

Care: Rated “good” for everyday wear. Avoid exposure to heat and sudden changes in temperature. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Brazil, East Africa, India, Sri Lanka

A durable and strikingly refractive green garnet, tsavorite resembles emerald in fine specimens. Named for the Tsavo National Park at the border of Kenya and Tanzania, where it was discovered, it rivals Demantoid as the chief of green garnets.

Stuller's Global Sourcing Network

Stuller's gemstone buyers travel worldwide, picking the best stones at the best prices. We're going to the source in Thailand, moving product quickly from mine to market. Our Bangkok office, now 26 associates strong, opened in 1996. Located in the hub of gemstone world, Stuller Thailand sources the best gemstones on the global market. Today, our specialist cutters handle 20+ stone types, including many rare items not likely to be found elsewhere. And with a graduate gemologist on staff as well as 25 years combined experience with our buyers and QA associates, our goal is a simple one, creating the best value for you.

The word jade originated during the Spanish colonization of Central and South America. “Piedra de ijada,” or hip stone, referred to widespread beliefs about its ability to heal sciatica and other ailments of the hip. This accords with a widespread belief in its healing properties.

Stuller.com/Jade

Gem Species: Nephrite

Hardness: 6-6.5

Enhancement Code: N

Quality Information:

Standard: Medium to medium dark apple green; good cut; good polish; low dome

Care: Rated “fair” for everyday wear with care.

Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Quality Information:

Standard: Milky, transparent to opaque, medium dome

Rainbow AA: Displays spectral colors of red, blue and green; transparent to opaque

Care: Rated "good" for everyday wear. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Major Sources: Australia, Brazil, India, Madagascar, Mexico, Sri Lanka, Tanzania, United States

The subtle interplay of light with layers of albite crystals in this pale, delicate stone is called adularescence, after Mount Adular in Switzerland, where it was once mined. The overall effects resemble the moonlight, and these refractions were once believed to be benevolent spirits.

Gem Species: Beryl**Hardness:** 7.5-8**Enhancement Code:** H**Quality Information:****AA:** Light to medium light pink; eye clean; good cut**Care:** Rated "good" for everyday wear. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.**Major Sources:** Brazil, Madagascar, United States

A soft, romantic pink beryl, morganite was discovered in Madagascar in the early 1900s. George Frederick Kunz, the eminent mineralogist and Tiffany & Co.[®] vice president, named it to honor his patron J.P. Morgan. As the story goes, he did this because he had previously failed to honor Morgan upon the discovery of another precious pink stone, kunzite, which he of course named for himself.

Black Box Gemstones[®] Morganite

Morganite is known primarily as a pastel-colored gem in light, soft shades of pink, purplish pink, and peachy pink.

This highly brilliant stone is ideal for romantic designs to highlight its feminine beauty. The color of morganite always emanates charm, esprit and a touch of tenderness.

Visit Stuller.com/BlackBoxMorganite.

Onyx

A popular stone for men's signet and intaglio rings going back to ancient Rome. Onyx was thought to enhance confidence and authority and to guard the heart from romantic obsession.

Stuller.com/Onyx

Gem Species: Chalcedony

Hardness: 6.5-7

Enhancement Code: D

Quality Information:

Standard: Black; good cut; good polish

Care: Rated "fair" for everyday wear. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Gem Species: Opal

Hardness: 5-6.5

Enhancement Code: N

Quality Information:

A: White background; good to medium fire; color ranges include blue, green, and red

AAA: White background; medium to strong fire; color ranges include blue, green, and red

Commercial 3: White background; fair to good fire; color ranges include blue, green, and red

Care: Rated “fair” for everyday wear. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Australia

October’s birthstone, opal is a magical, almost otherworldly gem. Once thought to include the colors of all precious stones, opals possess uncanny powers for a variety of cultures. Dangled as a hypnotic talisman or powdered into a compound to instill invisibility, opals, in one way or another, were and are bewitching and mysterious.

Mexican Fire Opal

Ranging from a striking dark orange to a brilliant cherry red, the fire opal is the national stone of Mexico. Mined almost exclusively in Querétaro, 125 miles northwest of Mexico City, fire opals are unique among opals in their uniform color and translucency.

Stuller.com/Mexican-Fire-Opal

Gem Species: Opal

Hardness: 5-6.5

Enhancement Code: N

Quality Information:

AA: Medium to dark orange-reddish orange; eye clean; faceted; good cut

AAA: (Cherry) Medium to dark orangey red; eye clean; faceted; good cut

Care: Take care when wearing Fire Opal. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Gem Species: Peridot

Hardness: 6.5-7

Enhancement Code: N

Quality Information:

AA: Medium to dark yellowish green; eye clean; good cut

AA: (Arizona) Medium to dark; slightly yellowish green; eye clean to slight imperfections; good cut; mined in Arizona

Swarovski Gemstones™ Apple Fine: Medium to dark color; minimal eye-visible inclusions

Care: Rated “fair” for everyday wear with care. Avoid exposure to heat and sudden changes in temperature. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Major Sources: Australia, Brazil, China, Kenya, Mexico, Myanmar, Sri Lanka, United States

Possibly from the Persian word “faridat,” meaning gem, peridot is another name for gem-quality olivine. Often mistaken for emeralds in the Middle Ages, peridot adorns some of the most ornate ecclesiastical jewelry, such as the famed Treasury of the Three Magi in the Cologne Cathedral in Germany. Peridot is one of a small group of gemstones that appears to exist in only one color. Today, the United States is the leading producer of peridot, with most production coming from the San Carlos Indian Reservation in Arizona.

Quartz takes its name from a Greek word meaning, “icy cold,” which reflects an early belief that it was a form of super cooled ice. A light, subtle green tinged sometimes with yellow, green quartz is also called prasiolite.

Stuller.com/Green-Quartz

Gem Species: Quartz

Hardness: 7

Enhancement Code: R

Quality Information:

A: Light slightly yellowish green; eye clean; good cut; good polish

Care: Rated “good” for everyday wear. Avoid direct sunlight and exposure to heat which may cause color to fade. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Gem Species: Quartz

Hardness: 7

Enhancement Code: N

Quality Information:

AA: Colorless; eye visible golden Rutile needles; good polish

Care: Rated “good” for everyday wear. Avoid direct sunlight and exposure to heat which may cause color to fade. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Australia, Brazil, Germany, India, Kazakhstan, Madagascar, Norway, Pakistan, Sri Lanka, Switzerland, United States

The breathtaking beauty of golden rutile is frozen in time inside clear quartz. Gemstone mythology attributes healing powers to rutilated quartz, helping the wearer find stability and balance in life.

Gem Species: Quartz

Hardness: 7

Enhancement Code: N

Quality Information:

AA: Colorless; eye visible black Tourmaline needles; good polish

Care: Rated “good” for everyday wear. Avoid direct sunlight and exposure to heat which may cause color to fade. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Africa, Brazil, Canada, India, Madagascar, Mexico, Myanmar, Namibia, South Africa, Sri Lanka, Tanzania, United States, Uruguay

Tourmalinated quartz is an unusual variety of quartz, sure to spark inquiry in any jewelry piece. A clear quartz, crisscrossed with shooting veins of black tourmaline, the complex patterns generated by these stones are utterly unique.

Stuller.com/Tourmalinated-Quartz

Gem Species: Corundum

Hardness: 9

Enhancement Code: H

Quality Information:

B: Light pinkish red; included; good cut; good polish

A: Medium pinkish red; slightly included; good cut; good polish

AA: Medium dark pinkish red; eye clean; good brilliance; good cut; good polish

Commercial: Commercial quality; variation in color; included

Care: Rated "excellent" for everyday wear. Avoid exposure to heat and contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Afghanistan, Cambodia, India, Kenya, Madagascar, Myanmar, Pakistan, Sri Lanka, Tanzania, Thailand

July's birthstone, ruby takes its name from Latin ruber, or red. Rarer than diamonds in large sizes, rubies are, for some, the supreme gemstone, leaving diamonds in the dust. Ancient Romans believed that rubies excited the passions and guarded one's wealth and rank. A kernel of truth lies behind the many stories about rubies glowing in the dark: As modern gemologists know, certain stones are demonstrably fluorescent.

Blue Sapphire

September's birthstone, sapphire is most famous as a stunning and regal blue gem. The blue sapphire, tinted by titanium and iron, reigns as a unique and potent precious gem. Ancient Romans believed that it guarded one from envy, increased wealth, and protected rulers from harm (especially from poisons).

Pink Sapphire

A stunning and feminine pink stone with the depth and class of its better-known blue siblings, pink sapphire pairs well with other pink, purple, or red gems.

Stuller.com/Pink-Sapphire

Gem Species: Corundum

Hardness: 9

Enhancement Code: H

Quality Information:

A: Light to medium light pink, little or no color zoning; very slightly included; good brilliance; good cut; good polish

AA: Medium pink, little or no color zoning; eye clean; good brilliance; good cut; good polish

AAA: Medium to dark pink, little or no color zoning; eye clean; good brilliance; excellent cut; excellent polish

Swarovski Gemstones™ Pink Fine: Light to medium pink; eye clean; excellent brilliance; excellent machine cut

Care: Rated "excellent" for everyday wear. Avoid exposure to heat and contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Major Sources: Australia, Cambodia, East Africa, India, Myanmar, Sri Lanka, Thailand, United States

White Sapphire

White sapphire is a popular choice for the customer who wants a precious, clear, and white stone that is natural and valuable in its own right. White sapphire stands on its own as a diamond alternative, offering the sapphire's reputation and allure at an economical price.

Stuller.com/White-Sapphire

Gem Species: Corundum

Hardness: 9

Enhancement Code: H

Quality Information:

AA: Near colorless (may be very slightly yellow, gray or blue); eye clean; good brilliance; good cut; good polish

Care: Rated "excellent" for everyday wear. Avoid exposure to heat and contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Black Box Gemstones® Sapphires

Sapphires cast a unique spell, and the assurances provided by Black Box Gemstones make that spell all the more enthralling. Hand picked for individual loveliness, Black Box sapphires are sure to quench the desires of even the most ardent sapphire enthusiast.

Choose from Blue, Yellow, Pink, and White Sapphires

Long prized for their velvety tones, blue sapphires are the quintessential blue gemstone. Yellow sapphires are thought to promote wisdom and prosperity, and they continue to grow in popularity, particularly in the United States. Lustrous and brilliant pink sapphires naturally reflect glamour and femininity, while white sapphires burn with a cool fire and pure white refractions.

Yellow Sapphire

A striking yellow gem that ranges from deep gold with hints of orange to a bright canary yellow, yellow sapphire brings cheer and light-heartedness to any jewel. A perfect complement to a gold, silver, or platinum setting, yellow sapphire conjures the warmth and joy of a sunny day.

[Stuller.com/Yellow-Sapphire](https://www.stuller.com/Yellow-Sapphire)

Gem Species: Corundum

Hardness: 9

Enhancement Code: H

Quality Information:

A: Light to medium yellow; eye clean; good brilliance; good cut; good polish

AA: Medium yellow; eye clean; good brilliance; excellent cut; excellent polish

AAA: Medium to dark yellow; eye clean; good brilliance; excellent cut; excellent polish

Care: Rated "excellent" for everyday wear. Avoid exposure to heat and contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Asscher Cut Princess Sapphires

Exclusively From Stuller

Part of our Black Box Gemstones® line, these stunning Asscher princess cut sapphires come in five different colors: blue, pink, purple, yellow, and white. They are cut from Sri Lankan sapphires, celebrated worldwide for their deeply saturated hues. This patented cut is a fusion of Asscher and princess cuts, with Asscher facets on the crown and brilliant princess facets on the pavilion. The cut results in twice as many facets, enhancing sparkle, scintillation, and dispersion. And the cut corners improve durability for everyday wear.

Black spinel rivals onyx as the foremost of black gemstones. Known as “blackjack” to Australian miners, black spinel is one of the rarest spinel. A sophisticated stone when set in jewelry, some believe that it eases a sad heart and promotes positive romantic relationships.

Stuller.com/Black-Spinel

Pink Spinel

Gem Species: Spinel

Hardness: 8

Enhancement Code: N

Quality Information:

Gem: Medium reddish pink; eye clean; good cut; good polish

Care: Rated “excellent” for everyday wear. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

From the Greek word for “spark” or “thorn,” spinel ranks as one of the most underappreciated gemstones. Until relatively recently, it was often confused with both ruby and pink topaz. Many famous historical rubies, in fact, were actually spinel.

Tanzanite

Louis Comfort Tiffany's great grandson, Henry B. Platt, famously gave tanzanite its name in 1968, when Tiffany & Co. made a deal to become its main distributor. A Maasai tribesman had discovered the first known tanzanite only a year earlier in the Arusha region of Tanzania, near Mount Kilimanjaro. A deep, luminous blue with hints of violet, tanzanite takes on a more purplish violet hue in artificial light.

Stuller.com/Tanzanite

Gem Species: Zoisite

Hardness: 6-7

Enhancement Code: H

Quality Information:

B: Light bluish purple, little or no color zoning; very slightly included; good brilliance; good cut; good polish

A: Medium light bluish purple, little or no color zoning; eye clean; good brilliance; good cut; good polish

AA: Medium bluish purple, little or no color zoning; eye clean; good brilliance; good cut; good polish

AAA: Medium dark bluish purple, no color zoning; eye clean; good brilliance; good cut and polish

Care: Tanzanite is not for everyday wear and one should take care when wearing it. Avoid exposure to heat and sudden changes in temperature. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Tiger Eye

Usually cut in cabochon or rounded into beads, which enhances the chatoyant effect, tiger eye is a popular choice for both men and women.

Stuller.com/TigerEye

Gem Species: Quartz

Hardness: 7

Enhancement Code: N (Brown)

Enhancement Code: B (Honey)

Quality Information:

Standard Honey: Golden honey color; good eye; good cut; good polish; medium dome

Standard Brown: Golden brown; good cut; good polish; medium dome

Care: Tiger eye is rated "good" for everyday wear. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

CAD/CAM Services

Our newly streamlined process in CAD/CAM Services gives you unparalleled access to the finest jewelry design and manufacturing technology in the industry. The new process makes it easier to submit your design and follow its progress.

We have options designed to meet all your customization needs.

- Submit your completed CAD model
- Send us your wax model
- Request further changes to any 3C Stuller style

Once we receive your submission, we will prepare your design for production. Then, we will send you photo-realistic renders of your design and a quote for approval.

Learn more at Stuller.com/CADCAMServices
or call today at 800-877-7777 ext. 3804.

London Blue Topaz

The clear, voluptuous color of blue topaz speaks for itself. A deeper, gray-blue stone, London blue topaz is both dignified and ethereal.

Stuller.com/London-Blue-Topaz

Gem Species: Topaz

Hardness: 8

Enhancement Code: R

Quality Information:

London Blue AA: Medium dark grayish blue; eye clean; good brilliance; good cut; good polish

Care: Rated "good" for everyday wear. Avoid direct sunlight and exposure to heat, which may cause color to fade. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

◇ Indicates limited supply item that may not be readily available and cannot be back-ordered due to rarity.

Sky blue topaz is the color of communication and self-expression. Found in greater abundance than aquamarine, it offers superb clarity and luminous color at a fraction of the cost. Blue topaz rivals aquamarine in color and charm.

Stuller.com/Sky-Blue-Topaz

Gem Species: Topaz

Hardness: 8

Enhancement Code: R

Quality Information:

Sky Blue AA: Bright light blue; eye clean; good brilliance; good cut; good polish

Care: Rated "good" for everyday wear. Avoid direct sunlight and exposure to heat, which may cause color to fade. Avoid contact with chemicals. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Swarovski Gemstones™ Passion Topaz

The multi-hued glory of Swarovski's passion topaz is entirely fitting considering its origin at the fiery intersection of nature and human technology. The result of a patented enhancement, passion topaz begins as white topaz before transforming into a spectrum of brilliant and consistent color profiles, such as ice blue, paraiba, baby pink, pink, honey, poppy, rainforest, and blazing red.

Gem Species: Topaz

Hardness: 8

Enhancement Code: C

Quality Information:

Swarovski Gemstones™ Ice Blue Fine: Medium blue; eye clean; good cut; good polish

Care: Rated "good" for everyday wear. Avoid contact with chemicals. Recutting is not recommended for Passion Topaz. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit. For gem properties and reactions, see pages 176-177.

Swarovski has a strong reputation for innovation, cutting precision, unrivaled quality, and service, all of which have been at the forefront of the international market since 1895.

The Swarovski Gemstones business leads the field worldwide, employing only the finest raw materials and the strictest manufacturing standards to conceive their genuine gemstones: sapphire, rhodolite, peridot, amethyst, citrine, black spinel, topaz, and marcasite, along with their created stones: zirconia and synthetic stones.

Swarovski cuts and polishes exclusively on their company premises, ensuring outstanding results in shape, color, and brilliance, and meeting the topmost social and environmental standards.

The word tourmaline comes from the Sri Lankan word turamali, meaning, “colored gemstone.” Although it occurs in a range of stunning colors, tourmaline is most desirable in pink and green, with green tourmaline earning the nickname, “Brazilian emerald.”

Customization — Easy and Fun With 3C

Our popular, flexible 3C styles let you and your customers play with different designs to achieve the look they want. It's fun and easy on Stuller.com.

And by the way, the 3C experience helps make that sale.

The 3C experience —

Choose a style. Choose a stone shape and size.

Choose a metal quality. Choose a stone type and color.

Visit Stuller.com/3C.

A birthstone for October, pink tourmaline was highly treasured in China, where they were the favorites of empresses and mandarins. Among the many fascinating properties of tourmaline is its piezoelectricity — the ability to convert pressure into a small electric charge. For this reason, the Dutch (who introduced the stone to Europe) used them to pull ashes out of their pipes, giving them the nickname aschtrekker, or “ash-puller.”

Gem Species: Tourmaline

Hardness: 7-7.5

Enhancement Code: H

Quality Information:

AA: Medium to medium dark pink; slightly included to eye clean; good cut

Care: Rated “fair” for everyday wear with care. Avoid exposure to heat and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Turquoise

A sacred stone for Native Americans across the Southwestern United States, as well as for the Aztecs and the ancient Egyptians, turquoise has an individual and potent appeal. Credited with a variety of magical properties in different parts of the globe at different times, turquoise was most famously believed to protect the wearer from injuries by falling, particularly from a horse.

Gem Species: Turquoise

Hardness: 5-6

Enhancement Code: I

Quality Information:

Standard: Bright light blue; no matrix; good cut

Care: Rated "fair" for everyday wear with care. Avoid exposure to heat, contact with chemicals, and protect from scratches and harsh blows. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Major Sources: Australia, Chile, China, Mexico, United States

DID YOU KNOW?

Pearls are the only gemstone made by a living creature.

For all your pearl needs visit Stuller.com and search "Pearls."

Gem Species: Zircon

Hardness: 7.5

Enhancement Code: H

Quality Information:

AA: Medium dark, slightly greenish blue; eye clean; good cut

Care: Rated “fair” for everyday wear with care. Avoid direct sunlight and exposure to heat which may cause color to fade. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water. For gem properties and reactions, see pages 176-177.

Major Sources: Australia, Cambodia, China, Myanmar, Sri Lanka, Thailand, Vietnam

December’s birthstone, blue zircon is not, nor has it ever been, cubic zirconia, and your customers should be aware of it. Zircon is a beautiful, brilliant, and unique natural gemstone that has been known since antiquity. Medieval Europeans believed that zircon promoted restful sleep and wealth, and that it dispelled evil spirits. The genius of 19th century gemology, George Frederick Kunz, was enamored of zircon — to the extent that he launched a campaign to rebrand it as “starlight” in recognition of its ethereal beauty.

Gem Species: Pearl

Hardness: 2.5-4

Enhancement Code: N

Quality Information:

Fancy-A: Overtones of pink, blue, gold, green, silver and reddish purple; very good luster; slight blemishes distributed over less than 10% of the surface

Medium Gray-A: Medium to medium dark gray; very good luster; slight blemishes distributed over less than 10% of the surface

Medium Gray-B: Medium to medium dark gray; good to medium luster; slight blemishes distributed over 30% of the surface

Medium Gray-C: Medium to medium dark gray; medium luster; slight blemishes distributed over 60% of the surface

Medium to Dark Gray-A: Medium to dark gray; very good luster; slight blemishes distributed over less than 10% of the surface

Medium to Dark Gray-B: Medium to dark gray; good to medium luster; slight blemishes distributed over 30% of the surface

Dark Gray-A: Medium dark to dark gray; very good luster; slight blemishes distributed over less than 10% of the surface

Dark Gray-B: Medium dark to dark gray; good to medium luster; slight blemishes distributed over 30% of the surface

Care: Pearls are not for everyday wear, and one should take care when wearing. Avoid exposure to heat, and protect from scratches and harsh blows. Avoid contact with chemicals, especially perfumes, perspiration and hair sprays. To clean, wipe gently with a moist cloth. For gem properties and reactions, see pages 176-177.

Major Sources: French Polynesia

Also known as “Black Pearls,” Tahitian Pearls smolder with a rich blend of peacock green, purple, and gray overtones. Found most famously in the crystal blue lagoons of French Polynesia, Tahitian pearls are formed within the pinctada margaritifera, or “black-lipped,” oyster. Although cultured today, they were harvested until recently by free-diving Polynesian fisherman. A great look for men in a cuff link or tie pin, and a sophisticated choice in earrings or necklaces for women of all ages.

Stuller.com/Tahitian-Pearls

Tahitian Pearl Strands are sold temporarily strung, averaging 16"-17" in length, unless otherwise noted.

Multicolored strands are a combination of White and Golden South Sea Pearls and Gray Tahitian Pearls.

Akoya Cultured Pearls

Perhaps the most renowned of cultured pearls, Akoyas come from the world's smallest pearl-producing oyster, the *pinctada fucata martensii*. The most sought-after pink-tinged white Akoya pearls are an elegant choice in a simple, classic pearl necklace, though the same oyster also produces a gorgeous dark gray-green pearl.

Stuller.com/Akoya-Pearls

Akoya Pearl Strands are sold temporarily strung, averaging 16" in length, unless otherwise noted.

Gem Species: Pearl

Hardness: 2.5-4

Enhancement Code: B (white); D (black)

Major Sources: China, Japan

The most affordable jewelry-grade pearls, Freshwater Cultured Pearls are actually not produced from an oyster, but rather from different species of freshwater mussel. While most freshwater pearls are cultivated and processed in China today, they also occur naturally in parts of North America, most famously is the Tennessee River Pearls that became famous in the 1980s.

Stuller.com/Freshwater-Pearls

Freshwater Pearl Strands are sold temporarily strung, averaging 16" in length, unless otherwise noted.

Major Sources: China, Japan

These petite pearls, a staple of Victorian jewelry, make for a stunning statement when roped together in an ornately clustered necklace or broach. Sometimes used to refer to any small pearl, "seed pearl" more specifically describes the tiny pearls that result from accidental dislocation of a piece of tissue within a mollusk during pearl cultivation.

Stuller.com/Seed-Pearls

Pearl Stringing

Imagine having highly skilled knotters ready to work for you on a moment's notice.

That's exactly what Stuller provides through our stringing services.

Use this service to encourage customers to design their own personalized pearl necklaces

or bracelets. Choose from our extensive inventory of South Sea, Tahitian, Akoya, and

Freshwater cultured pearls. Then select a plain or jeweled clasp to complement

them. You'll receive the finished necklace or bracelet in five days.

For more information, visit Stuller.com/PearlStringing.

Gem Species: Pearl

Hardness: 2.5-4

Quality Information:

Standard: Assembled cultured pearl dome cemented to a mother-of-pearl backing

Care: Pearls are not for everyday wear, and one should take care when wearing. Avoid exposure to heat, and protect from scratches and harsh blows. Avoid contact with chemicals, especially perfumes, perspiration and hair sprays. To clean, wipe gently with a moist cloth. For gem properties and reactions, see pages 176-177.

Major Sources: China, Japan

The oldest cultured pearl, Chinese innovators first cultivated this specimen more than 700 years ago. Mabé pearls are unique in that they grow within the shell of the oyster, instead of within its soft tissue.

CHARLES & COLVARD

forever
ONE™

Quality Information:

Forever One Moissanite, Very Good: Man-made; colorless; eye clean; excellent brilliance; good cut; good polish

Care: Moissanite is rated “good” for everyday wear. To clean, gently scrub with a soft toothbrush and a solution of mild dish soap and warm water, or clean in an at-home ultrasonic unit.

Forever One created an exclusive series of pure, colorless moissanite in D-E-F. This stunning achievement required the development of highly refined technologies. Forever One offers you the ultimate choice for bridal and fine jewelry — one that costs only a fraction of a comparable diamond.

Astonishing Fire

With the introduction of Forever One, Charles & Colvard now offers three grades of Moissanite (see facing page). Through unique optical properties, each grade mesmerizes with flashes of radiant fire.

Charles & Colvard Created Moissanite has dispersion 2.4 times higher than diamond, a greater refractive index than diamond: 2.65 to 2.69, and double refraction on the upper pavilion facets for astonishing fire.

Each hand-faceted moissanite is cut to perfect proportions and hand polished for across-the-room brilliance.

For more information, visit Stuller.com/MoissaniteBenefits.

forever
BRILLIANT®

Quality Information:

Forever Brilliant Moissanite, Very Good:

Man-made; near colorless; eye clean; excellent brilliance; good cut; good polish

With Forever Brilliant, Charles & Colvard achieved a near colorless gem in G-H-I. It is four shades whiter than Forever Classic, Forever Brilliant has a noticeably brighter and purer sparkle that delivers breathtaking bursts of vivid color. For bridal and fine jewelry, Forever Brilliant costs a fraction of a comparable diamond.

Chatham® Created Gemstones

As Beautiful as Nature Itself

The Unique Discovery of Chatham

In 1938, after many years of research and determination, Carroll F. Chatham, a young scientist in San Francisco, California, discovered the secret of growing gems. He realized that by duplicating the conditions deep within the earth, the proper temperatures, pressures and chemical solutions, his laboratory was capable of actually growing gems. Gemstones possessing the same physical, chemical, spectral, and optical qualities of mined gems at a fraction of the cost. A discovery so unique, it remains a carefully guarded family secret to this day.

Reasons to Buy Chatham Created Gemstones

1. Commitment to the highest standard of quality and service.
2. Long term history of achievement and presence in the fine jewelry industry.
3. Identical chemical, optical, and physical characteristics to their mined counterparts.
4. The most beautiful gemstones at a fraction of the price from their natural counterpart.
5. Never treated, colors are permanent, and part of the growth process.
6. Chatham Created Gemstones are the only gemstones covered by a lifetime warranty.

For more information, visit Stuller.com/Chatham.

Birthstones — Where Customization Begins

View our huge selection of birthstone solutions

It's true. Customization and personalization are all the rage. But jewelers have always known that people want jewelry that reflects individuality. Birthstones are full of tradition and superstition. Wearing the gem associated with one's birthday is commonly thought to bring good luck or good health.

Even long before the modern birthstone business began in Europe in the 17th century and exploded in America, certain gems were widely linked to birth dates in cultures across the ancient world.

Birthstones are the custom trend that never ends.

For our range of birthstone selling kits and our full line of birthstones by month, visit [Stuller.com/Birthstones](https://www.stuller.com/Birthstones).

Gemstone Color Reference

The color chart below represents the color ranges of Stuller's transparent, genuine gemstones. Please note that quality variances may be due to clarity and not color. This chart does not display clarity differences.

ENHANCEMENT:

Any traditional process other than cutting and polishing that improves the appearance (color/clarity/phenomena), durability, or availability of a gemstone.

N The "N" symbol appears on the chart only for natural stones which are not currently known to be enhanced; however, the "N" symbol can also be used for other natural gemstones in the event that a gemstone has received no enhancement and the seller will provide a guarantee that there has been none.

SYMBOLS FOR SPECIFIC FORMS OF ENHANCEMENT

ASBL ASSEMBLED

"ASBL" is the tag code for products made of multiple layers or combinations of manufactured and/or natural material fused, bonded, or otherwise joined together to increase stability and/or imitate the appearance of a natural gemstone, create a unique design or generate unusual color combinations.

B BLEACHING

The use of heat, light, and/or other agents to lighten or remove a gemstone's color.

C COATING

The use of such surface enhancements as lacquering, enameling, inking, foiling, or sputtering of films to improve appearance, provide color, or add other special effects.

D DYEING

The introduction of coloring matter into a gemstone to give it new color, intensify present color, or improve color uniformity.

F FILLING

The filling of surface-breaking cavities or fissures with colorless glass, plastic, solidified borax, or similar substances. This process may improve durability, appearance, and/or add weight.

H HEATING

The use of heat to effect desired alteration of color, clarity, and/or phenomena. If residue of foreign substances in open fissures is visible under properly illuminated 10X magnification H and F should be used.

HP HEATING AND PRESSURE

The use of heat and pressure combined to effect desired alterations of color, clarity, and/or phenomena.

IMIT IMITATION

"IMIT" is the tag code used for a manufactured product fabricated in such materials as glass, ceramic, or plastic designed

to imitate or resemble the appearance, but not duplicate the characteristic properties of a natural gemstone.

"IMIT" is also the tag code for a simulant, which is defined as man-made single crystal product that is used to simulate the appearance, but not duplicate the characteristic properties of the natural gemstone it imitates.

I IMPREGNATION

The impregnation of a porous gemstone with a colorless agent (usually plastic) to improve durability and appearance.

L LASERING

The use of a laser and chemicals to reach and alter inclusions in gemstones, usually diamonds.

O OILING/RESIN INFUSION:

The filling of surface-breaking fissures with colorless oil, wax, resin, or other colorless substances, except glass or plastic, to improve the gemstone's appearance.

SYN SYNTHETIC:

The tag code may be used to describe "synthetic" materials that have essentially the same optical, physical and chemical properties as a naturally occurring counterpart.

R IRRADIATION:

The use of neutrons, gamma rays or beta particles (high energy electrons) to alter a gemstone's color. The irradiation may be followed by a heating process.

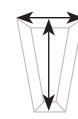

U DIFFUSION:

The use of chemicals in conjunction with high temperatures to produce artificial color change and/or asterism-producing inclusions.

W WAXING/OILING:

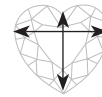

The impregnation of a colorless wax, paraffin, and oil in porous opaque or translucent gemstones to improve appearance.

MEASURING STONES

BAGUETTE STONES

Measured vertically from the top to the bottom and across the widest part on straight baguettes or both end widths on tapered baguettes.

HEART-SHAPED STONES

Measured vertically from the top to the bottom and across the widest part.

HEXAGON-SHAPED STONES

Measured flat side to flat side.

MARQUISE-SHAPED STONES

Measured from the top point to the bottom point and across the widest part.

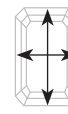

OVAL-SHAPED STONES

Measured vertically from the top to the bottom and across the widest part.

PEAR-SHAPED STONES

Measured vertically from the top to the point and across the widest part.

RECTANGLE-SHAPED STONES

Measured vertically from the top to the bottom and across the widest part (Includes Octagon, Cushion, and Antique Cushion shapes).

ROUND-SHAPED STONES

Measured across from one edge to the opposite edge, crossing the center point.

SQUARE-SHAPED STONES

Measured vertically from the top to the bottom and horizontally from side to side (Includes Antique, Princess-cut and Square, Step-cut shapes).

TRIANGLE/TRILLION-SHAPED STONES

Measured vertically from the base to the point.

Stone Properties and Reactions

Stone Type	RI	Specific Gravity	Species	Optic Character	Phenomena	Ultrasonic	Steamer	Heat	Harmful Chemicals
Alexandrite	1.746-1.755	3.73	Chrysoberyl	DR	Color Change	Usually safe	Usually safe	Stable	None
Amethyst	1.544-1.553	2.66	Quartz	DR	None	Usually safe	Risky	Poor - color change may occur with heat	Hydrofluoric acid, ammonium fluoride
Ametrine	1.544-1.553	2.66	Quartz	DR	None	Usually safe	Risky	Fair - color change may occur with heat	Hydrofluoric acid, ammonium fluoride
Aquamarine	1.577-1.583	2.72	Beryl	DR	Chatoyancy (rare)	Usually safe	Usually safe	Usually safe	Hydrofluoric acid
Bloodstone	1.535-1.539	2.60	Chalcedony	AGG	None	Usually safe	Usually safe	Poor - color change may occur with heat	Hydrofluoric acid
Cameo - Shell	1.53-1.685	2.86	Calcareous	AGG	None	Risky	Risky	Very poor - blackening of stone may occur	Attacked by acids
Cameo - Agate	1.535-1.539	2.60	Chalcedony	AGG	None	Usually safe	Usually safe	Very poor - blackening of stone may occur	Attacked by acids
Carnelian	1.535-1.539	2.60	Chalcedony	AGG	None	Usually safe	Usually safe	Poor - color change may occur with heat	Hydrofluoric acid, nitric acid
Chalcedony	1.535-1.539	2.60	Chalcedony	AGG	None	Usually safe	Usually safe	Poor - color change may occur with heat	Hydrofluoric acid
Chrysoprase	1.535-1.539	2.60	Chalcedony	AGG	None	Usually safe	Usually safe	Poor - color change may occur with heat	Hydrofluoric acid
Citrine	1.544-1.553	2.66	Quartz	DR	None	Usually safe	Risky	Fair - color change may occur with heat	Hydrofluoric acid, ammonium fluoride
Coral	1.486-1.658	2.65	Calcareous	AGG	None	Risky	Risky	Very poor - blackening of stone may occur	Attacked by acids
Diamond	2.417	3.52	Diamond	SR	None	Safe	Safe	Good	None
Emerald	1.577-1.583	2.72	Beryl	DR	Chatoyancy, Asterism (rare)	Risky	Never use	Very poor - should never be heated	Hydrofluoric acid
Garnet - Mozambique	1.714-1.742	3.78	Pyrope	SR, often ADR	None	Usually safe	Risky	Fair to poor - temperature changes may cause fracturing; fuses easily	Hydrofluoric acid
Garnet - Rhodolite	1.76	3.84	Rhodolite	SR, often ADR	None	Usually safe	Never use	Fair to poor - temperature changes may cause fracturing	Hydrofluoric acid
Garnet - Spessartite	1.81	4.15	Spessartite	SR, often ADR	None	Usually safe	Never use	Fair to poor - temperature changes may cause fracturing	Hydrofluoric acid
Garnet - Tsavorite	1.74	3.61	Grossularite	SR, often ADR	None	Usually safe	Never use	Fair to poor - temperature changes may cause fracturing	Hydrofluoric acid
Hematite	2.94-3.22	5.20	Hematite	Opaque	None	Usually safe	Usually safe	Fair - may become magnetic	Hydrofluoric acid
Iolite	1.542-1.551	2.61	Iolite	DR	Rare	Risky	Risky	Poor; fusible	Attacked by acids
Jade - Nephrite	1.606-1.632	2.95	Nephrite	AGG	None	Safe	Safe	Poor - no repairs near stone	Warm acids
Jade - Jadeite	1.666-1.680	3.34	Jadeite	AGG	None	Safe	Safe	Poor - no repairs near stone	Warm acids
Lapis	1.500 or 1.670	2.75	Lapis Lazuli	AGG	None	Risky	Never use	Poor - color change may occur with heat	Hydrochloric acid, cyanide solution
Malachite	1.655 - 1.909	3.95	Malachite	Opaque	None	Never use	Never use	Sensitive to high temperatures	Attacked by acids
Marcasite	Over limits of refractometer (above 1.81)	5.00	Pyrite	Opaque	None	Safe	Safe	Poor - fuses easily under a jewelers torch	Nitric acid; surface oxidizes over time
Moissanite	2.65- 2.69	3.218 -3.22	Silicone Carbide	DR	None	Safe	Safe	Stable	None
Moonstone	1.518-1.526	2.58	Orthoclase Feldspar	DR	Adularescence	Never use	Never use	Poor	Hydrofluoric acid
Morganite	1.577-1.583	2.72	Beryl	DR	None	Risky	Risky	Poor - should never be heated	Hydrofluoric acid and solvents

Stone Properties and Reactions

Stone Type	RI	Specific Gravity	Species	Optic Character	Phenomena	Ultrasonic	Steamer	Heat	Harmful Chemicals
Onyx	1.535-1.539	2.60	Chalcedony	AGG	None	Usually safe	Usually safe	Fair - color change may occur with heat	Hydrofluoric acid, nitric acid
Opal - White	1.45	2.15	Opal	SR, ADR (common)	Play of color	Never use	Never use	Very poor - may cause cracking, change in color or change in phenomena	Hydrofluoric acid caustic alkalies
Opal - Mexican Fire	1.37-1.43	2.15	Opal	SR, ADR (common)	Play of color	Never use	Never use	Very poor - may cause cracking	Hydrofluoric acid caustic alkalies
Pearl - Akoya Cultured	1.53-1.685	2.72-2.78	Pearl	AGG	Orient	Never use	Never use	Poor - high heat may cause burning	All acids
Pearl - Freshwater Cultured	1.53-1.685	2.66-2.78	Pearl	AGG	Orient	Never use	Never use	Poor - high heat may cause burning	All acids
Pearl - Cultured Seed	1.53-1.685	2.66-2.78	Pearl	AGG	Orient	Never use	Never use	Poor - high heat may cause burning	All acids
Pearl - Mabé Cultured	1.53-1.686	saltwater - 2.72-2.78	Pearl	AGG	Orient	Never use	Never use	Poor - high heat may cause burning	All acids
Pearl - South Sea	1.53 - 1.685	2.72 - 2.78	Pearl	AGG	Orient	Never use	Never use	Poor - high heat may cause burning	All acids
Pearl - Tahitian	1.53 - 1.685	2.72 - 2.78	Pearl	AGG	Orient	Never use	Never use	Poor - high heat may cause burning	All acids
Peridot	1.654-1.690	3.34	Peridot	DR	None	Risky	Never use	Poor - rapid heat may cause fracturing or breakage	Sulfuric acid, hydrochloric acid, pickling solution
Quartz - Lemon, Green, Smoky	1.544-1.553	2.66	Quartz	DR	None	Usually safe	Risky	Poor - color change may occur with heat, may fracture under abrupt temperature changes	Hydrofluoric acid, ammonium fluoride
Quartz - Rutilated	1.544-1.553	2.66	Quartz	DR	None	Usually safe	Risky	Poor - color change may occur with heat, may fracture under abrupt temperature changes	Hydrofluoric acid, ammonium fluoride
Quartz - Tourmalinated	1.544-1.554	2.66	Quartz	DR	None	Usually safe	Risky	Poor - color change may occur with heat, may fracture under abrupt temperature changes	Hydrofluoric acid, ammonium fluoride
Ruby	1.762-1.77	4.00	Corundum	DR	Asterism, Chatoyancy	Usually safe	Usually safe	Good - may improve color	Solutions containing Boron (very rare)
Sapphire	1.762-1.77	4.00	Corundum	DR	Asterism, Color Change, Chatoyancy (very rare)	Usually safe	Usually safe	Poor - may sometimes improve color, but may cause loss of color	Solutions containing Borax
Spinel	1.718	3.60	Spinel	SR	Asterism (rare), Color Change	Usually safe	Usually safe	Poor - color change may occur with heat	None
Tanzanite	1.691-1.700	3.35	Zoisite	DR	Chatoyancy (rare)	Never use	Never use	Very poor - fuses easily, sudden temperature changes may cause cracking	Hydrochloric/ hydrofluoric acid
Tiger's Eye	1.544-1.553	2.64-2.71	Quartz	AGG	Chatoyancy	Usually safe	Risky	Poor - rapid heating may cause fracturing or breakage	Hydrofluoric acid, ammonium fluoride
Topaz	1.619-1.627	3.53	Topaz	DR	Chatoyancy (rare)	Never use	Never use	Poor - fracturing or color change may occur with heat	Affected very slightly
Topaz - Passion	1.619-1.627	2.72	Topaz	DR	None	Usually safe	Usually safe	Usually safe	Hydrofluoric acid
Tourmaline	1.624-1.644	3.06	Tourmaline	DR	Chatoyancy, Color Change (rare)	Risky	Risky	Fair to poor - may cause color change or fracturing	None
Turquoise	1.610-1.650	2.76	Turquoise	AGG	None	Never use	Never use	Very poor - will break into pieces	Hydrochloric acid, specific gravity liquids
Zircon, Blue	1.925-1.984	3.90-4.73	Zircon	DR	Chatoyancy (rare)	Risky	Risky	Poor - color change may occur with heat	None
Zirconia, Cubic	2.15	5.80	Zirconia, Synthetic	SR	None	Safe	Safe	Sensitive to high temperatures	None

TRADITIONAL GENUINE BIRTHSTONES

Month	Stone
January	Garnet
February	Amethyst
March	Aquamarine, Bloodstone
April	Diamond
May	Emerald
June	Pearl, Moonstone, Alexandrite
July	Ruby
August	Peridot, Sardonyx
September	Sapphire
October	Opal, Pink Tourmaline
November	Topaz, Citrine
December	Turquoise, Blue Zircon, Tanzanite

** All sizes based on available sizes within series
 Stuller's Diamond & Gemstone Division uses digital readout gauges which measure to three decimal places. Every order processor and quality assurance associate has his or her own digital gauge, and each member of management also has an electronic digital caliper.
 The gauges used in Stuller's Diamond & Gemstone Division have a tolerance of +/- .03mm. This gauge tolerance means that each time the gauge measures something, it may give a different reading, up to the amount of the tolerance. Our gauges are calibrated every week to ensure consistent measurements.*

Order Online at Stuller.com

Take advantage of quick and easy ordering and enjoy the following benefits:

- From any computer, tablet, or mobile phone, go to **Stuller.com/Diamonds** or **Stuller.com/Gemstones**.
- Check current pricing and availability on more than 200,000 SKUs—24/7, 365 days a year.
- Place orders quickly and accurately.
- Track shipments, view previous orders, and print any of your invoices.
- Use Schedule Order, and add to your cart all day. Submit your order automatically at your predetermined time.
- Live, text-based chat is available to assist you Monday through Friday, 8:00am to 6:00pm CST.
- For **web assistance**, call 877-619-2174.

Order by Phone

In the continental U.S., orders placed before 5:00 pm (4:00 pm Pacific time) will be shipped the same day. Canadian and International accounts must place orders by 2:00 pm CST for same day shipping. Place orders toll-free by phone, fax, email sales@stuller.com, or on stuller.com.

To ensure accuracy when placing orders for an item, be prepared to give the following information: account number, account name, your name, complete series number, karat, color, size, quantity, conditional sale number (if applicable).

Click SIGN UP at the top of stuller.com to create your online account. We'll verify your information, and send an email confirmation that your login/password is ready for use. Go to stuller.com, click Login, and enter it for full access to the site. Use the Quick Order feature on the home page when you know exactly what you want to order.

Pricing Information

Prices are updated, and new products are added daily (Monday-Friday) to our web site stuller.com. Quantity discounts are available on many of our loose gemstone products. Discounts represent "parcel prices," not "pick prices," therefore partial returns will be reinvoiced for the amount kept based upon that purchase quantity. Quantity discounts do not apply to the requests for matching items, special orders, limited availability items, or customized orders.

D&G Directory of Sales and Services

SPECIAL ORDERS

Red Box Diamonds®

Your diamond expert can help you find the Red Box Diamond your customer is looking for, helping you make a sale. And if we don't have that special diamond, we'll find it; special requests are welcome. Call 1.800.877.7777, press 5.

Black Box Gemstones® and Pearls

Your gemstone and pearl experts will assist with unique gems available from our Black Box Gemstone program, our pearl product line, or with specific special requests. Call 800-877-7777, press 6.

RED BOX DIAMONDS® LASER ENGRAVING SERVICE

Custom engraving is available for purchased Red Box Diamonds. Your clients can engrave up to 35 characters, and you can inscribe your store name and logo. For details, call 800-877-7777, press 9, 3949# for Chetta.

MAIL-IN MATCHING SERVICE

When you have a replacement stone that is difficult to match, send your job to Stuller. We'll do the hard work for you. Mail your job to —

Stuller, Inc.

Attention: Chetta - Department 43

302 Rue Louis XIV

Lafayette, LA 70508

Shipping Information

Most items in this catalog are available for same-day shipping, next-day delivery. Ground delivery service is available for items that are too large or too heavy for next-day delivery to be cost effective. Your sales consultant will discuss alternative shipping options with you when you order. Freight and insurance are billed at the time of shipment.

- **Truck Shipments/UPS/FedEx**

All carriers are responsible and liable for any damages that occur during transit. If you suspect any damage or shortage caused during transit, do not sign freight bill or receipt without making a notation on the freight bill. Retain all packing material and shipping cartons until the carrier has made an inspection. File a claim directly with the carrier within 15 days. Stuller CANNOT file a claim for you.

- **Hazardous Materials Shipping**

The Department of Transportation (DOT) governs the labeling, packaging, and handling of certain materials. These standards increase costs from shipping companies for handling (currently an additional \$20-\$30 to each separate package or chemical). Some of your packaging amounts may change. We continually update our shipping policies, and try to minimize the DOT charges where possible. Material Safety Data Sheets are sent with all required items and contain important, safety recommendations, and emergency procedures. Additional copies are available by contacting Tools Customer Service. Keep on file for quick reference.

Return Policy

We want you to be happy with everything you purchase from us. If you are not satisfied and need to return merchandise, we will give you full credit, provided you follow these procedures. Stuller is not responsible for returns that are damaged in transit.

1. You must return items for credit in their original packaging materials, unaltered, and in resellable condition, within 10 days of invoice date for diamonds and gemstones with grading reports. Make sure they are packaged securely and insured for full value.
2. Include the perforated Merchandise Return Form from your invoice or the original invoice with the returned items. Please include the reason for return. Merchandise returned without this form or a copy of the invoice may be charged a service fee of \$10.00, or we may return the merchandise to you at your expense.
3. Address your package to Stuller, Inc., Attn: Customer Service, 302 Rue Louis XIV, Lafayette, LA 70508. All returns must be shipped prepaid (No CODs).
4. Upon receiving your return, we will exchange, replace, or credit. You will receive credit in the same manner as you paid for the merchandise.

Items with manufacturing defects may be returned for exchange. We regret that we cannot accept returns for special order items, Stuller Overstock items, altered items, used tools, videos, cut items, or books. For exchanges, products are credited to your account. The price of the new product will be charged to your account, along with any exchange fee. Be aware that normal shipping charges do apply. Except for specific Stuller programs that make provisions for "conditional sale" merchandise (finished jewelry, large diamonds, and gemstones), products cannot be ordered for review. Such returns will be charged a 15% restocking fee. A 15% restocking fee may also be charged for all returns from accounts that consistently abuse the return privilege.

Information is current as of January 2016.

Ask your sales consultant to fax, email, or mail a copy of Stuller's Red Box Diamonds® and Black Box Gemstones® Price list.

Ordene por internet con Stuller.com

Aproveche de esta forma rápida y fácil de ordenar y disfrute de los siguientes beneficios:

- Revise precios y disponibilidad de más de 200,000 SKUs (números de serie) – 24 horas, 7 días a la semana, 365 días del año.
- Haga sus órdenes rápidamente y con precisión.
- Rastree los paquetes, vea órdenes anteriores, e imprima cualquiera de sus facturas.
- Establezca el horario de su orden y agregue a su carro de compra durante todo el día, y envíe la orden automáticamente a una hora predeterminada por usted.
- Tenemos disponible conversación por CHAT en vivo, para asistirle de lunes a viernes, de 8 a.m. a 6 p.m. hora central CST.
- Para Asistencia en la Página de Internet llame al número número 877-619-2174.

Ordene por teléfono

Ordenes puestas antes de las 5:00 PM (4:00 hora del Pacífico), dentro de los Estados Unidos, serán enviadas el mismo día. Las ordenes de cuentas Canadienses e internacionales deben ser puestas antes de las 2:00 PM CST (hora central) para ser enviadas el mismo día. Usted puede hacer una orden llamando gratuitamente por teléfono, fax, correo electrónico a sales@stuller.com o mediante la página de internet stuller.com.

Vaya a stuller.com, haga click en Login y así podrá tener acceso completo al sitio de internet. Utilice la opción Quick Order (Orden Rápida) en la página principal cuando usted sepa exactamente lo que quiere ordenar.

Información de Precios

Los precios son actualizados y productos nuevos son añadidos a diario (lunes-viernes) a nuestra pagina web stuller.com. Los descuentos por cantidad están disponibles para varios de nuestros surtidos de piedras preciosas. Los descuentos representan “Precios de surtido”, y no “Precios Escogidos” así que devoluciones parciales serán refacturadas por el total basado en la cantidad obtenida. Los descuentos por cantidad no aplicaran a pedidos de articulos parejos, ordenes especiales, artículos limitados u ordenes personalizadas.

Directorio de ventas y servicios

Ordenes Especiales

Red Box Diamonds®

Su experto en diamantes puede ayudarle a encontrar el diamante Red Box que su cliente está buscando y así facilitar la venta. Si no tenemos el diamante especial que busca lo encontraremos para usted. Las peticiones especiales son bienvenidas. Llame al número 800-877-7777, presione 5.

Black Box Gemstones® y Perlas

Su experto en piedras preciosas y perlas puede ayudarle a encontrar piedras preciosas únicas de nuestro programa Black Box Gemstones®, nuestra selección de perlas o con pedidos especiales específicos. Llame al número 800-877-7777, presione 6.

Red Box Diamonds® Servicio de grabado láser

Le ofrecemos grabación personalizada con la compra de Red Box Diamonds®. Sus clientes podrán grabar hasta 35 caracteres y usted podrá grabar el nombre de su negocio y su logotipo. Para más detalles, llame al número 800-877-7777, presione 9, 3949# y pregunte por Chetta.

Servicio de Igualado de Piedras

Cuando usted tenga dificultad con una piedra de remplazo para formar un par, mande la piedra a Stuller y nosotros le ayudaremos. Envíe la piedra a la siguiente dirección:

*Attention: Chetta – Department 43
302 Rue Louis XIV
Lafayette, LA 70508*

Información de Envío

La mayoría de los artículos en este catálogo están disponibles para ser enviados el mismo día y ser entregados al día siguiente. El servicio de entrega por tierra está disponible para piezas que son muy grandes o muy pesadas y por lo cual las entregas del día siguiente serían muy costosas. Su consultora de ventas le informará de las diferentes alternativas de envío que usted tenga cuando haga una orden. El flete y seguro son facturados al momento del envío.

- **Envíos de Camión/UPS/Fed Ex.** Todas las compañías de transporte son responsables y propensas a pagar por cualquier daño que ocurra durante el envío. Si usted sospecha de cualquier daño o sustracción causado durante el envío, no firme la factura de flete o recibo sin hacer mención de éste en la factura. Retenga todo material del paquete tal cual se le entregó hasta que la transportadora realice una inspección. Haga su reclamo directamente con la compañía transportadora dentro de los 15 días. Stuller No Puede hacer un reclamo por usted.
- **Envío de Material Peligroso.** El Departamento de Transportación (DOT) gobierna el rótulo, empaque y manejo de envío de ciertos materiales. Estos estándares incrementan costos de compañías transportadoras por manejo de envío (actualmente a un costo adicional de \$20-\$30 por cada paquete separado o artículo químico). Algunos de sus montos de envío pueden cambiar. Nosotros actualizamos continuamente nuestras políticas de envío y tratamos de minimizar los cargos de DOT donde sea posible. Hojas de Datos de Material de Seguridad son enviadas con todos los artículos pertinentes y contienen importantes recomendaciones de seguridad y procedimientos de emergencia. Para copias adicionales de éstas contacte al Departamento de Servicio al Cliente de Herramientas. Mantenga estas hojas de datos en archivo para una referencia rápida.

Política de Devolución

Nosotros queremos que usted esté contento con todo lo que usted ordena con nosotros. Si usted no está satisfecho y necesita devolver mercancía, le daremos el crédito total si usted cumple con los siguientes requisitos.

1. Usted debe devolver artículos para crédito en sus materiales de empaque original, sin cambios ni en condición de reventa, 10 días después de la fecha de la factura para diamantes serializados y piedras preciosas. Asegúrese de que están empaquetados de forma segura y aseguradas por valor total.
2. Incluya la Forma de Devolución de Mercancía que está en la parte perforada de su recibo o la factura original, con los artículos que devolverá. Por favor incluya la razón por la cual hace la devolución. Mercancía devuelta sin esta forma o una copia de la factura será sujeta a una cuota de cargo por servicio de \$10.00, o la mercancía será retornada a usted con los respectivos cargos de envío por los cuales usted será responsable.
3. Envíe el paquete a Stuller, Inc., Attn: Customer Service, 302 Rue Louis XIV, Lafayette, LA 70508. Toda devolución debe ser enviada pre-pagada (No se aceptan CODs). Si Fed Ex es la transportadora, usted puede usar las etiquetas PRP (Pre-pagadas) que recibo con su orden. Llame a Fed Ex para que recogan el paquete. Haga que el agente de FedEx (o recepcionista) firme y ponga la fecha en la forma. El número de recibo del transportador es un recibo y la información de guía del envío. Una tarifa fija de \$8.50 será cargada a su factura para paquetes menos de cinco libras y menos de \$1,000.
4. Cuando recibamos su devolución, realizaremos el intercambio, reemplazo, o crédito. Usted recibirá crédito en la misma forma que hizo el pago por la mercancía.

Artículos con defectos de manufacturación pueden ser devueltos para su intercambio. Lamentamos informarle que no podemos aceptar devoluciones de artículos hechos mediante el programa de Stuller Studio, Ordenes Especiales, artículos de exceso de inventario en oferta, artículos alterados, herramientas usadas, videos, piezas cortadas, o libros. Para intercambios, los artículos serán acreditados en su cuenta. El precio de los nuevos artículos serán cargados a su cuenta junto a una cuota de cambio correspondiente. Tenga en cuenta que cargos de envío normales aplican. Excepto por algunos programas de Stuller específicos que hacen ciertas exclusiones para mercancías de "ventas condicionales" (joyería terminada, diamantes y piedras preciosas certificadas), el resto de los artículos no pueden ser ordenados para su revisión. Tales devoluciones serán sujetas a una tasa de reposición del 15%. Una tasa de reposición del 15% podría ser aplicada a todas las devoluciones de cuentas que constantemente abusen del privilegio de la política de devolución.

Información actualizada Enero 2016.

Pídale a su consultora de ventas que le envíe por fax, email o correo una copia de listado de precios de nuestro surtido de Red Box Diamonds® y Black Box Gemstones®.
